

ServiceNow CSM – Course Curriculum

Module 1 — Introduction to ServiceNow CSM

- Introduction to Customer Service Management
- CSM overview and architecture
- CSM use cases
- B2B vs B2C customer service
- CSM vs ITSM
- CSM application and modules
- CSM personas and roles
- Customer service lifecycle

Module 2 — ServiceNow Platform Fundamentals

- ServiceNow platform overview
- Applications and modules
- Tables and records
- Lists and forms
- Users, groups and roles
- Basic navigation
- Configuration vs customization
- Update sets
- Application scope

Module 3 — CSM Foundation Data

- CSM data model
- Accounts
- Contacts
- Consumers
- Users
- Customer relationships
- Account teams
- Groups and group members
- Foundation data configuration

ServiceNow identifies customer data, user management, product data and data models as core parts of setting up a CSM environment.

Module 4 — Customer & Account Management

- B2B customer management
- B2C customer management
- Account hierarchy
- Contacts

- Consumer records
- Customer relationships
- Account teams
- Customer 360
- Customer information management

Module 5 — Product & Asset Management

- Product models
- Sold products
- Installed products
- Install base
- Assets
- Asset-contact relationships
- Product relationships
- Product lifecycle
- Customer assets and service history

Module 6 — CSM Case Management

- CSM cases
- Case lifecycle
- Case creation
- Case types
- Case categories
- Case priority
- Case assignment
- Assignment groups
- Case escalation
- Case states
- Case closure
- Case management best practices

Case Management is one of the central CSM capabilities for creating, routing and managing customer cases.

Module 7 — Case Types & Service Definitions

- Case types
- Service definitions
- Case templates
- Case categories
- Case tasks
- Case relationships
- Service catalog integration
- Complaint cases
- Inquiry cases
- Onboarding cases

- Major issues

Module 8 — Entitlements, Contracts & SLAs

- Service contracts
- Entitlements
- Customer entitlements
- SLA concepts
- SLA configuration
- Response and resolution targets
- Entitlement rules
- Contract relationships
- SLA monitoring
- Escalation management

Module 9 — Knowledge Management

- Knowledge Management overview
- Knowledge bases
- Knowledge articles
- Article creation
- Article approval
- Article lifecycle
- Knowledge search
- Knowledge for agents
- Knowledge for customers
- Knowledge feedback
- Knowledge management best practices

Module 10 — CSM Configurable Workspace

- CSM Configurable Workspace
- Agent workspace
- Customer 360
- Case workspace
- Agent tools
- Related records
- Workspace configuration
- Agent productivity
- Workspace personalization

Module 11 — CSM Portal & Self-Service

- Customer Service Portal
- Portal architecture
- Customer login
- Customer registration
- Portal navigation

- Case creation through portal
- Case tracking
- Knowledge search
- Service catalog
- Configurable portal widgets
- Portal customization

Module 12 — Playbooks & Process Automation

- Playbook fundamentals
- Playbook stages
- Playbook activities
- Guided case resolution
- Process automation
- Flow Designer integration
- Automated notifications
- Automated case activities
- Business process automation

CSM playbooks provide step-by-step guidance to agents through stages and activities for resolving specific types of cases.

Module 13 — Advanced Work Assignment

- Advanced Work Assignment (AWA)
- Assignment rules
- Queues
- Skills
- Agent capacity
- Agent availability
- Work routing
- Skill-based routing
- Assignment optimization
- AWA implementation

Module 14 — Omnichannel & Contact Center

- Customer communication channels
- Email
- Chat
- Phone
- Messaging
- Social channels
- Contact Center as a Service (CCaaS)
- Channel management
- Agent interaction management
- Omnichannel customer experience

ServiceNow CSM supports customer interactions through channels such as web, email, chat, telephone and social media.

Module 15 — Virtual Agent

- Virtual Agent overview
- Conversational experiences
- Topics
- Topic design
- Customer self-service
- Case creation through Virtual Agent
- Knowledge search
- Agent handoff
- Virtual Agent with CSM

Module 16 — Automation & Integrations

- Flow Designer
- Business rules
- Notifications
- Integration concepts
- REST APIs
- IntegrationHub
- External CRM integration
- Customer data integration
- Case integration
- Import sets
- Transform maps

Module 17 — CSM Reporting & Analytics

- CSM dashboards
- Reports
- Performance metrics
- Case volume
- Case aging
- Resolution time
- SLA performance
- Customer satisfaction
- Agent performance
- Performance Analytics basics

Module 18 — CSM AI & Now Assist

- AI in CSM
- Now Assist overview
- Case summarization
- Recommended actions

- Knowledge assistance
- AI-powered customer service
- AI agents
- Generative AI use cases
- Responsible AI considerations

ServiceNow currently positions AI and Now Assist as part of CSM capabilities for self-service, agent productivity and workflow automation.

Module 19 — CSM Administration

- CSM system properties
- Roles and permissions
- ACLs
- Groups
- Users
- Configuration
- Data management
- Notifications
- Security
- Application configuration
- Troubleshooting

Module 20 — CSM Implementation

- CSM implementation methodology
- Requirement gathering
- Customer service process mapping
- Data migration
- Foundation data setup
- Configuration
- Testing
- User acceptance testing
- Deployment
- Post-production support
- Implementation best practices
